PEGGED WHEAT PRICE REMOVED

MEMBER SEEKS FORCE ELECTION

FRENCH FIRM ON DISARMAMENT

Last Thursday the Winnipeg Grain Exchange announced the removal of the "pegged" price of wheat, and almost immediately the market dropped below the 70 cent mark. Since that date, however, the price has rallied somewhat. In the opinion of John L. McFarland, general manager of the Canadian Co-operative Wheat Producers Limited, central agency of the wheat producers, removal of the pegged price will be beneficial in developing more volume in the export of Canadian wheat. In my opinion the Winnipeg Grain Exchange acted very wisely in their action on the "peg" because of the extraordinary and critical conditions existing at that time in other world grain markets."

TORONTO—Harry C. Nixon, Ontario Progressive leader has filed a petition at the Ontario legislative buildings which he said would probably force the government of the province to call a budgeted election in the constituency of East Kent, where a vacancy exists. Mr. Nixon said he invoked a legislative authority which, authorities said, never before had been called upon with regard to a budget. It was signed by Dr. L. J. Simpson, Liberal legislator for Centre Simcoe. Mr. Nixon presented his petition to the Clerk of the House, who will forward it to the speaker. It was believed the petition would force the Speaker to issue a writ demanding the by-election.

PARIS—New disarmament proposals in a determined effort for British and American support were understood to have been made to Captain Anthony Eden of Great Britain and General H. D. G. Crerar, Canadian with Prince P. G. Roosevelt, and more were pleading for universal disarmament. The French, who are seeking a united front against Hitlerism at the present time, are generally preferred to carry on the negotiations in the work in separate talks with Mr. Davis, who expected to see the premier and Foreign Minister without the British representatives being present. The proposals were submitted to the British cabinet. It was said, which the French were willing to adopt in return for support at Geneva. They remained firm, however, regarding the necessity of a permanent alliance and no reduction of forces until that control was made effective.

## HARVESTING PRACTICALLY COMPLETED

In spite of the damp weather during the past week, many have completed threshing operations and others have only a couple of days more at the most. There are plenty of grain in the districts and take the time to do it did not take many long to thresh.

Average yield will be about 18 or 20 bushels to the acre.

## PROVIDE \$100,000.00 FOR FINANCING WHEAT

The Dominion government is understood to be providing a hundred million dollars, roughly, to deal with the wheat situation.

Farmer secrecy surrounds the figures for this year as before, but grainmen are said in well informed quarters to be continued in respect to the wheat which is on hand and is an initial way in which the grain situation is to be handled by the Central Sales Board.

Just what quantity of wheat the government is responsible for has not been officially stated, but there are reports that the amount of grainmen is distributed in a two month period is \$100,000,000 and that of bushels at 90¢ a bushel.

What the effect of this new financing on the grain market will be is not a position to say. What will all depend upon the unusual conditions in the world market, a continuation of the support is reasonably expected to have a stabilizing effect upon wheat prices and with a tendency to appreciation.

## CASH INCOME \$257 FOR FARMERS IN UNITED STATES

In a sampling study of 6,533 farmers in representative localities, the department of agriculture at Washington found that the average cash income of each for 1932 was \$257. This compares with \$155 in 1931 and \$199 in 1930.

The figure is the excess of cash income over cash expenditures but does not include the value of farm products on the farm, the value of the living expenses of the farmer and his family. These farmers reported that they consumed food from their own production valued at \$161 at farm prices during 1932.

## DANCE TO BE HELD ON FRIDAY, SEPTEMBER 29

Another dance is to be held under the joint auspices of the Carbon Tennis and Curling Club, in the Farmers Exchange Hall, Friday night, September 29th. Good time is to be had in the socials and entertainment and the first dance of the fall season and with harvesting practically completed a large crowd is expected.

The proceeds are of a community benefit and go towards paying for the new pumping system.

## Science Steps In To Lend Assistance To Ship Navigation And Safeguard Life and Property

It is of vital importance to a shipmaster that he should know, from time to time, the depth of water beneath his keel. For centuries a bar of lead, greased at its base, was attached to a line and lowered overboard as slowly hauled once more to the deck. It was a long stride ahead when steel wire of the utmost strength, of the least possible bulk, displaced the lead weight and the ropes. And now steel wire is superseded by a method which employs only sound as its servant. On the keel of a steamship is fastened a resonant metal which, struck by a hammer every two seconds, sends sound waves through the hull faster than through air, and four-and-a-half times faster. When the sound-waves reach the sea-bottom they are echoed back to the ship with the exact time occupied in their flight. Not only is the sea-depth, but a great deal more. Listeners become expert in detecting whether it is a rock, a ledge, a sandy level, or a stretch of shale which returns a particular sound.

Chief among the hazards of navigation is fog. Fortunately fog is penetrable by sound waves and by radio waves which are available to every amateur. In a fog an American ship, through its radio apparatus, keeps in touch with at least two of the one hundred radio stations which are scattered over the United States. With two messages from two stations before him the captain readily knows where he is, and with little or no slackening of speed reaches port in safety.

Through the wireless today every ship, worthy of the name, has a radio receiver. When that receiver says "S.O.S., save our ship," the captain need only turn his radio to the ship in distress. It is, of course, most desirable that every ship should have a radio operator on board. Two operators would be better still. But even where there is no radio operator on board, the signal may be distinctly heard and legibly recorded, thanks to a newly devised radio receiver of high sensitivity and dependability.

For a good many years the weather bureaus of the United States and Canada have rendered an inestimable service by their advance notices of storms and tempests. Weather bureaus, once more, radio their warning messages received from on land but at sea, by every ship in touch with the shore.

Icebergs have dealt death to uncounted myriads of mariners and their passengers. It might be supposed that the first intimation outside a ship would announce the approach of an iceberg. A better tell-tale is a simple apparatus which measures the electrical conductivity of the water surrounding a ship. That conductivity varies with the percentage of salt in the water, so that the comparative freshness of that water gives an alarm to be heeded.—By George H. Lee, author of "Leading American Inventors."

### Prince Sells English Farm

Herd Of Pedigree Shorthorns Were Sold

A London cable to the New York Times says the Prince of Wales' farm in Nottinghamborough has been sold to G. R. Shelton, with the herd of pedigree Shorthorns going to the well known exponent, W. B. Shelton.

In connection with the sale it is recalled a recent rumor that the Prince would sell his Albert ranch for purposes of economy, was denied.

The Prince bought the Nottinghamshire farm in 1919 with the intent of using it as a home for his son, the Duke of Cornwall. The buildings were modernized and electricity was used wherever possible for light and power. His object in acquiring the farm was to have his wife free from agricultural work when exhibited at agricultural shows in the North and Midlands.

### A Good Exercise

People should walk more; it is the most natural exercise. There is, there is, both physically and mentally, the Kitchener Record. One sees things in walking along; then stir the mind to activity and at the same time the lungs are drawn in and out. The steady swing of the feet and arms helps the circulation and sends the blood coursing to all parts of the body.

Experiments in growing tobacco are being made in Egypt, home of the Egyptian cigarette but where no tobacco is produced.

Manitoba Takes Silver Cup At Canadian National Exhibition

For the highest scoring creamery butter, the silver cup, has been awarded to the Manitoba creamery, of Manitoba, Man., by Canadian National Exhibition judges. The Manitoba creamery scored 97.7.

Although Manitoba butter took the majority of awards as usual, competition from Ontario was keen. The silver cup was won by the Manitoba creamery, of Winnipeg, with a 14-pound box of unsalted creamery went to Peel Creamery, Brampton, Ont., with a score of 97.6. The Swift-Candies Company of Neepawa, Man., was in second place.

Manitoba Dairymen of St. Boniface, Man., walked off with first prize in the division for salted creamery butter in 20-pound boxes, with the Saskatchewan Co-Operative Creamery of Regina second.

### Protects Cultivators Of Land

New Law In Palestine Prevents Land Speculation

The widely-espoused ordinance for the protection of cultivators has been officially promulgated in Palestine by the high commissioner, Sir Arthur Grenfell Wauchope.

Any tenant who has occupied and cultivated a tract of land for at least a year becomes a "statutory tenant" under the ordinance. He cannot be evicted if he pays his rent, unless the landlord puts his disposal in the same vicinity a "sublease" area approved by the high commissioner.

### Demand For Fertilizers

Use In Canada Is Showing An Appreciable Increase

The use of various chemical fertilizers in Canada is becoming widespread and in normal times reaches considerable proportions.

There were 60 plants engaged in making mixed fertilizers and fertilizer plants in Canada in 1930, the output of which totalled 254,632 tons.

Sales of fertilizers in the year under review amounted to 265,442 tons of which 179,866 tons were sold in Canada and 85,459 tons were exported.

Increasing world demand for fertilizers is carried on by the Canadian Government Experimental Farms System at its branch farms and stations in every province of the Dominion. It has been found that the majority of crops—the use of "complete" fertilizer mixture—use furnishing nitrogen, phosphoric acid and potash—best, especially in Canada and in British Columbia.

The increasing attention given to pasture fertilization in the stock raising and dairying districts of Canada is creating an appreciable increase in demand for fertilizers.

### Interested In Tree-Planting

Many Thousands Attend Lectures In Canadian Forestry Week

In a recent two weeks period the tree-planting car of the Canadian Forestry Association on its annual tour of the prairie provinces visited over a score of places, giving 28 lectures to total attendance of around 4,000 persons. Addressing the conditions along the lines visited have made tree planting difficult during the past few years, but interest in the work, a belief in the benefits of tree planting, has not abated.

Since commencing its tour of 1933, the first three months of which were devoted to Saskatchewan, the car has visited 75 communities at which 165,000 people have been held, to a total attendance of 25,000 people, mostly rural dwellers.

The past four years, all over the treeless plains, have proved that trees can, and are being successfully grown.

### Dangerous For Dogs

Reports come to us of many fatal results to dogs from playing with swallows. One friend writes of a poor poodle known to her whose dogs had died from swallowing pieces of such toys. Post mortems disclosed the rubber as the cause of death. We hope all dog owners will be warned against this danger.—Our Dumb Animals.

## Highway and Park Improvements Being Carried Forward As Unemployment Relief Measures

In addition to their primary function of serving as places of rest and recreation for winter sports and for tourists for winter and summer, the National Parks of Canada at present are occupying an important place in the economic life of the country in providing work for the large number of the unemployed. This is strikingly brought out in a statement made by Hon. G. Murphy, Minister of the Interior, upon his return to Ottawa after a trip through the four western provinces in which he made a personal inspection of the work now being carried on in the National Parks. Mr. Murphy drew attention to the fact that during the fiscal year ending March 31, 1933, more than \$630,000 was expended in the National Parks as a measure of unemployment relief, enabling the Department of the Interior, under the jurisdiction of which the parks fall, to give the services of a large number of unemployed men, and also to supply the means for their maintenance during such period of employment.

At the present time many projects are in progress under the direction of the National Parks Service. Department of the Interior. Relief works are now under way in the Banff, Jasper, Waterton Lakes, and Elbow Island National Parks, and in the Kootenay and Alberta National Parks in Saskatchewan; and in Riding Mountain National Park in Manitoba, and in Riding Mountain National Park in Saskatchewan. Recreaton on the lakes and rivers are also being developed, the law and order needs of the tourist of Waswanipi is being reduced. A new fence is being constructed about the animal paddock at Aude Lake, and a telephone line is being built from Aude Lake to the park headquarters.

Strict attention is being paid to the welfare of the men who are engaged in the work, and near the tourist of Waswanipi is being reduced. From a tourist point of view, the Banff-Jasper highway is of great economic importance, for, when completed, it undoubtedly will help to swell the great tide of tourist travel to the Canadian Rockies. The "Big Bend" road now under construction, connecting the Golden Gate and known as "Big Bend" Highway between Daniel, B.C., and the Crows River, is also proceeding under direction of the National Parks Service.

WORLD HAPPENINGS  
BRIEFLY TOLD

First silver to be down out from Great Bear Lake was valued at approximately \$4,000. It was flown out to the coast in a small plane.

Ocean-borne traffic at the five ports of the Kwantung Leased Territory in Manchuria in the first seven months of this year was greater than in the same period of 1931 and 1930.

The whole village of Capelan, a native Indian community situated near Pointe Daigle, was enriched recently when 100 pounds of ambergris were found in the carcass of a whale which stranded on the beach.

Dr. Hugo Eckener has been appointed by the Brazilian Government for all-year Zeppelin service between Europe and Brazil. Brazil agreed to erect suitable housing facilities for the airship.

William Cody Braden, 60, neph of Col. C. W. St. John F. (Buffalo Bill) Cody, shot himself to death at his home in Casper, Wyoming. He was believed to have been despondent because of ill health.

The U.S. Government is considering asking the next session of Congress to ratify a series of bilateral treaties embodying reciprocal tariff concessions, particularly with Canada and Latin-American countries.

Hubert Scott-Paine will make a second and third attempt to wrest the Harcourt speedboat trophy from Gar Wood, American title-holder, in 1934. A definite statement to this effect came from the British pilot Sarnia.

Kids' Boys' Band, fresh from its world triumph at the Chicago World's Fair, was welcomed home to Vancouver by thousands of persons and masses gathered at the railway station. Later they were officially welcomed at the Canada Pacific exhibition.

International Highway  
Practically Completed

Attractive Scenic Route From Peace River District To San Diego

A new international tourist highway connecting Canada and the United States practically completed with road widenings and the name of the Sunshine Highway. This highway, the only international project of its size east of the Rocky Mountains, connects Alberta's extensive highway system with the State of California. It passes through Alberta, the United States-Canadian border southward of Lethbridge to the Peace River, a distance of 725 miles, has completed for some time past and is now engaged in completing the last link of the highway in that State.

Announcement of the completion of the new route was given at the Sunshine Trail Convocation recently held in Lethbridge, Alberta. That stretch of road is 100 miles longer than the highway from Alberta to the United States border southward of Lethbridge to the Peace River, a distance of 725 miles, has completed for some time past and is now engaged in completing the last link of the highway in that State.

For the larger portion of the distance this highway is an all-weather route, being gravelled in Alberta to 60 miles north of the city of Lethbridge, a distance of 420 miles. The route through Montana, which is Highway No. 91 of that state, is all-weather road the entire distance. From Salt Lake City to the Peace River is a distance of over 1,000 miles.

The new highway gives easy access to the Rocky Mountain resorts of Montana and Alberta by connecting all-weather roads.

## Australia's New Currency

Water-Marks Show Head Of Prince Of Wales

The head of the Prince of Wales, in profile, is one of the innovations introduced in the new currency notes shortly to be put into circulation in Australia. It is the first time that the coat-of-arms watermark has been placed on the commonwealth coat-of-arms watermark. When held up to the light the features of the head to the throne will be seen facing those of the King.

Another change is that the prints to pay in gold has been deleted.

## Advance In Television

Berlin's big radio show regulars marked advances in television. New and increased production demanded from the firm of 90,000 sets a 180 Bacs on a 15 by 15 centimeter surface, with almost perfect results. In transmitting 25 pictures per second 1,000,000 prints are flashed off. It is this size and clarity that give exacting reproductions.

## Clock Made Many Trips

Timepiece of Pacific Liner Now in Radio Room At Repulse

A clock which made 263 trips across the Pacific Ocean to China on the old "Empress of Japan," and which for the past 11 years has been in use in Repulse Bay, Vancouver now adapts the radio operating room of CKCK, Regina, Saskatchewan.

Some 12 years ago, Bert Hooper, engineer of CKCK, but then wireless operator on the "Empress" of the Canadian Pacific Company, was assigned on board the "Empress" by his company as operator in charge of the ship's wireless system.

Mr. Hooper had then been with the Canadian Pacific Company some six years and was also the "Empress" for nearly two years.

When the "Empress" was sold and dismantled records and some of the equipment was taken ashore and placed in the radio office once of the Marconi Company.

Some weeks ago Mr. Hooper visited the coast and called upon his old chief, Mr. S. Hawkin, superintendent of the Pacific Coast Division of the Canadian Marconi Company.

Before leaving he was presented with the timepiece which hung in the wireless operating room of the "Empress."

## Modern Wireless Station

Erected On Site Where Marconi Made Earliest Experiments

Signor Guglielmo Marconi is "extremely gratified" to know a modern wireless station has been erected on the site of his earliest experiments in trans-Atlantic telegraphy.

Following the opening of the new Signal Hill station, successor to the one Marconi telegraphed from in 1901.

Addressing as follows: "I recollect with keenest pleasure my associations with your country and the generous support given by its government to my early experiments in wireless telegraphy."

After due consideration, and with great pleasure, I have decided to make a gift of \$10,000 to the Canadian Atlantic wireless communication, and am particularly gratified to know that on the very site where those tests were carried out, a modern station is now installed embodying latest developments."

## Recipes For This Week

(By Betty Barclay)

## RIFLE GRAPE JAM

4½ cups (1 ½ lbs.) prepared fruit  
7 cups of sugar  
½ bottle fruit pectin.

To prepare fruit, slip skins from about 3 pounds fully ripe grapes. Slipper pulp, cover, 5 minutes. Remove seeds by sieving. Chop or grind pulp and, if desired, grated pulp of 1 orange. Stir until mixture boils. Cover, 30 minutes. (Wild grapes, Malgas and other tight-skinned grapes may be stemmed, skinned and cut in small pieces and boil 30 minutes, sliced, and then measured. With tight-skinned grapes add juice of 1 lemon to water. Use 4 cups prepared fruit.)

To prepare jam, prepare fruit until large kettle, mix well, and bring to a full rolling boil over hottest fire. Stir constantly before and while boiling. Hold 1 minute. Remove from fire and stir in bottled fruit pulp. Four quarts. Paraffin not just a must, but what's the use of having \$33,000 if you can't let the world know about it?" Joe said.

Some men boast that they can't be fooled twice in the same way, but there are lots of other ways.

## FRUIT RAISIN SALAD

(Serves 6)

Lettuce  
6 oranges  
½ cup seedless raisins.

Arrange shredded lettuce on individual saucer plates. Peel and slice oranges and arrange in circles on lettuce. Fill circles with seedless raisins. Serve with Sweet French dressing or with orange juice mixed with equal parts of honey or jelly.

## Real Globe-Trotter

Eighty-Year-Old Woman Making Forty-Fifth Trip Around World

Mrs. Jane Lee of Kansas City, eighty-year-old woman with snow-white hair, has just stopped in Paris again after a long absence around the world. She has been making this trip for forty years, she says she doesn't like to stay in one place.

Mrs. Lee knows the Yukon, has sailed to the Antarctic Circle and this year is doing a thorough job of the Balkans.

A British report says that in the past year 58,000 men have been killed in British coal mines.

## AMAZINGLY ATTRACTIVE IS THIS HOME FLOOR WITH THE SUBLIME AUREA OF YOUTH

It's a floor that's prettily novelty rayon print. It is a lovely pattern of powder-blue with navy blue stripes. The white plique collar is so unusual.

It's so called because it is designed in sizes 16, 18, 20, 22, 24, 26, 28, 30, 40 and 42 inches wide. Size 36 requires 5½ yards, 38, 39, 40, 41, 42, 43, 44, 45 yards of 3½-inch contrasting and 2½ yards of binding.

It's a carpet for daytime wear, just omit the pocket.

A crepe silk in bright and gay colors, the pattern of which is a grey crepe would be nice medium.

Price of pattern 25 cents a square or cord (can is preferred). Wrap cold carefully.
